

PRODUCT DATA SHEET

Insulation plate enlargement
Diameter 100 mm
Item no. 15331

Status: 02.08.2026 | 17:20

Designation	Insulation plate enlargement Diameter 100 mm
Description	Insulation plate, Ø 100 mm, with central opening for the dowel and additional perforation for better adhesion of the reinforcement mortar. Suitable for screw dowels 15291-15302 to increase the dowel contact surface and improve the holding force of the dowel, especially for light or thick panels.
Product area	Thermal insulation
Product category	Assembly elements
Revision	After installation, the insulation plates are completely covered with reinforcing mortar and embedded in the fabric to achieve a continuous plaster surface and prevent thermal bridges and visible plate marks.
Application Areas	The insulation plates are used in composite thermal insulation systems (ETICS) to fasten insulation boards such as EPS or mineral wool. They increase the holding force of the dowel, especially with lightweight insulation materials or thick boards.
Underground	The selection is made in combination with ETA-approved insulation anchors, which are specified in the respective system's certificate of suitability.
Treatment	The insulation plates are placed on the appropriate insulation dowels or snapped into place and sunk flush with the insulation layer surface. They are usually fastened by hammering or screwing through the insulation board into the substrate. The insertion depth of the dowel and the exact installation procedure depend on the ETA of the respective dowel.
Storage	Store cardboard in a dry place.
Customs tariff number	39269097
Opened label	Purchase only possible as full packaging units.
