

PRODUCT DATA SHEET

Movement bead

Screed

Item no. 3923

Status: 31.07.2026 | 21:51

Designation	Movement bead Screed
Description	PROTEKTOR movement bead for screeds is used to create movement joints with shear force dowelling. The profile is particularly suitable for flowing screeds, as the protruding foam strip prevents the flowing screed from overflowing. The supplied screed dowels with a slippery and elastic plastic coating are inserted directly under the metal rail. The screed dowels enable transverse force dowelling and reduce possible height offset of the screed. The heating pipes for underfloor heating can be laid through the PE strip. Function: • Expansion joint • Particularly suitable for flowing screeds • Straight joint line • Clean surface finish • Transverse force dowelling • Height offset
Product area	Concrete / Screed
Product category	Joint profiles
Overplastering Ability	54 screed dowels nr. 3940 are enclosed in the packaging.
Annotation	54 screed dowels nr. 3940 are enclosed in the packaging.
Customs tariff number	73269098
Processing instructions	Installation takes place before the screed is laid. The profile is laid in accordance with the prescribed joint plan and may be sealed using the adhesive tape. The dowels are installed horizontally, at a right angle in relation to the joint. The distance between the dowels is approx. 30 cm. Once the screed has dried, cut off the protruding foam material strips flush along the screed surface (see installation example, similar to 3916).
Opened label	Purchase only possible as full packaging units.

Item number	Length (cm)	Material	Packaging unit
102604	250.00	Galvanised steel + PE foam	6 PCS / 25 BOX
